REMARKS

25X1X

SOURCE [REDACTED]

25X1X

1. During the period from 20 through 22 October 1952, source observed that 16 trucks daily picked up planks and boards for Cottbus airfield at the sawmills in Weisswasser and Krauschwitz. [REDACTED] 25X1B

25X1B

2. In late October, source observed that the trainers at the field were fitted with retractable landing gears. The aircraft resembling the Klemm-25 type planes were no longer observed at the installation. New trainers had definitely arrived at the field.

3. Between 3:15 and 3:55 p.m. on 5 November, 8 twin-engine Li-2 transports landed at the field. Flying was done in single-engine trainers. [REDACTED] 25X1

25X1

25X1

In the afternoon of 6 November, there was no flying. A Li-2 was seen parked in front of the hangars. Three trucks [REDACTED] a fire truck and a tank truck were seen at the fire station. The observation towers near the single-story temporary buildings quartering VP personnel were empty.

4. On 8 November, there was flying by Po-2 biplanes and single-engine aircraft fitted with rigid landing gears.

25X1X

5. On 8 November, a twin-engine transport fitted with single rudder assembly landed at the field. At 6 p.m., all the windows at the barracks installation of the field were lighted. The sentries observed wore red-bordered black epaulets. There was no flying on 10, 15 and 18 November. Only twin-engine transports were seen outside the hangars. Soldiers who wore red-bordered black epaulets appeared to be quartered at the barracks installation of the airfield. Sizable quantities of bricks, lime and cement were stored along the Cottbus-Burg highway near the new VP barracks installation. [REDACTED] 25X1B

25X1B

6. From noon to 1:30 p.m. on 13 November, 14 single-engine, low-wing monoplanes fitted with radial engines, two-bladed propellers and long plexiglass cabin circled the field. One Li-2 was parked in front of the closed hangars. VP guards patrolled the boundaries of the field. From 3:30 to 4 p.m. all the planes were parked in front of the hangars, and the VP sentries had been withdrawn. The landing field was being rolled by a track-laying vehicle towing

six rollers. At noon on 18 November, 20 single-engine, low-wing monoplanes were parked in front of the closed hangars. There was no flying. About 50 aircraft crates were still seen in the northeastern portion of the landing field. From 3:30 to 4:30 on 25 November, six single-engine, low-wing monoplanes [redacted] practiced local flying. Another eight single-engine, low-wing monoplanes and a Li-2 were parked in front of the closed hangars.

25X1

25X1 7. [redacted] On 20 November, five large fuel containers were shipped by rail from the airfield to Bergen on Rue en Island and 20 containers to Kammersdorf.³

25X1

25X1 1.

25X1A2. [redacted] Comment. It is believed that the VP student pilots are being trained with Yak-18s. According to previous information, this type of plane is fitted with a rigid landing gear. However, there are indications that there exists a version of this type fitted with retractable landing gear.

25X1A3. [redacted] Comment. [redacted] The observation of numerous soldiers wearing red-bordered black epaulets supports the previous assumption that a supply unit is stationed at Cottbus airfield besides the Soviet and VP air force personnel.
